YOUR ONE STOP TO GLOBAL EXHIBITION & EVENTNEEDS

- LINGA EXPO IS A LEADER IN CONSTRUCTION OF FAIR STANDS
- We place approximately 8,000 m2 of exhibitions space in the most important fair locations on the map of Europe and Globally.
- Specialized in custom stand builds from Concept to Commissioning for all major Trade Events & Exhibition Globally.
- All “In House” – Design, Project Management and Experiential Technology.
- International Associates: Dubai, Singapore, South Africa (Johannesburg), China, India.
- We have international exposure to understand the need and expectations of our clients to provide seamless quality experience of Exhibition Booth, conferences and seminars.
- The business promotion in a competitive environment makes it challenging to stand out in the crowd and we have proven track record to impress the competition.
- We know how to create top-class buildings that stand out from others while maintaining competitive prices.

Design Team

Our award winning 3D designers create innovation stands that enhance your brand and maximise your budget. For clients exhibiting globally we create design solutions that allow the stand to be used in multiple configurations and transported to various locations. High resolution CGI visuals enable you to fully approve your stand before installation.

Manufacture

As one of the largest, most established exhibition companies in the EU, our state of the art manufacturing facilities and talented craftsmen and project managers ensure that your stand will be built and installed on time and on budget. Attention to detail and customer service are our USP whatever the size of your stand backed up by ISO Certification and a portfolio of global brands across a brand spectrum of industries.

Digital Print

Our in-house large format print facilities provides support of our exhibition services keeping control over the quality of the finished visual graphics on every exhibition stand, kiosk, pavilions, promotional campaigns in shopping malls, advertising hoardings and way finder programmes.
